

Installation Guide for Fixed Position Rectangular Suction Pipe, R1000

The fixed rectangular pipe, R1000, consists of an 80 X 30 mm aluminum pipe which is sealed on one side. The vacuum hose of the suction unit is simply plugged onto the downward facing plastic connector suitable for hose diameters from 35 to 40 mm.

Drawers below the rectangular pipe may not be longer than 370 mm.

The mounting points are compatible to standard Freuding mounting points.
